| • SCSS | • MySQL | • C, C++, C# (Conceptual) | • GitHub - Version Control |
| • Tailwind CSS | • PHP | • React.js (Conceptual) | • Plesk |
| • Animate.js | • Laravel | • VUE.js (Learning) | • AWS (Maintainable) |

Experience

Soft Host IT

2022-10 – Present

Lead the development and maintenance of **web applications** using **PHP, Laravel, Livewire, React.js, jQuery, HTML, CSS, Tailwind CSS, and Bootstrap**. Manage **Plesk, and cPanel** environments, overseeing deployments and server performance. Collaborate with **UI/UX teams** and create **logos and interface designs** using **Figma, Canva, and Photoshop** to deliver cohesive, user-focused digital solutions.

Rapid IT

2021-07 – 2022-02

Built and maintained web application with PHP, Laravel, and jQuery, HTML, CSS and Bootstrap.

- As a beginner developer, I have gained valuable experience in customizing a range of multilevel marketing websites and product-based network business management platforms within this company.

Projects

- **BHisab | PHP (Laravel), MySQL, JavaScript, jQuery & Bootstrap**
BHisab is a versatile inventory management system designed for Super Shops, Agro businesses, Pharmacies, and Electronics stores. It also includes specialized variants tailored for Dealers, Brick businesses, and Agro industries.
- **Babsayee | PHP (Laravel), MySQL, JavaScript, jQuery & Bootstrap**
Babsayee offers both a mobile application and a website. It's a sleek and intuitive billing system crafted specifically for mobile users. The APIs that drive this project are custom-built by me, ensuring a seamless and efficient experience.
- **B-Invoicing | PHP (Laravel), MySQL, JavaScript, jQuery & Bootstrap**
B-Invoicing offers web application. It's a sleek and intuitive billing system crafted specifically for mobile users. The APIs that drive this project are custom-built by me, ensuring a seamless and efficient experience.

- **Central Panel | PHP (Laravel), MySQL, JavaScript, jQuery & Bootstrap**
This central panel acting as centralized management and administration of various web properties of multiple websites.
Features of Central Panel: Order management system, Invoice for orders, Generate Monthly Renewal, Payment Management, Agent Management, Task Management for staff, Billing Cycle System, Package, SMS panel, Manage software landing page, Follow-up conversation & Payment Gateway (SSLCOMMERZE, bKash).
- **Support Open Ticket System | PHP (Laravel), MySQL, JavaScript, jQuery & Bootstrap**
Built a Support Ticket Application for a client to streamline customer service operations, featuring ticket creation and tracking, agent assignment, priority setting, and communication history.
- **Customer Support Chatting Application | PHP (Laravel), MySQL, JavaScript, jQuery & Bootstrap**
A simple, end-to-end chatting system designed for customer support, easily integrate able with any website.
- **Multivendor Ecommerce | PHP (Laravel), MySQL, JavaScript, jQuery & Bootstrap**
This is a straightforward e-commerce project designed for selling paintings. It features a user-friendly, multi-vendor system tailored to meet the client's specific requirements.

- **Exchange and Pick Shopping portal | PHP (Laravel), MySQL, JavaScript, jQuery & Bootstrap**
Slogan: "One person's trash could be another's treasure"
Example: Suppose you have an old watch; you can give it away then anyone can buy it with their points. And you have your points in your wallet.
Demo - <https://donate4reuse.com/>
- **Dealer Management System | PHP (Laravel), MySQL, JavaScript, jQuery & Bootstrap**
Demo - <https://demo.lilitraders.com>
- **Banking Agency Management System | PHP (Laravel), MySQL, JavaScript, jQuery & Bootstrap**
This project is a comprehensive Banking Agency Management System, designed to include all the essential features typically found in a robust banking management platform. Member, Accounts, Credits, Debits, Voucher, Reports, and Role management also have in this.
GitHub Link - <https://github.com/ahmedemon/banking-agency>

In addition to the above, I've worked on several other projects (client-based and personal) such as: E-commerce, Restaurant management system, Simple Courier Management System, Travel Agency, Chatting System, Point of Sale, Tax Consultancy websites and so on.
